

MK METALLIC TALK-THROUGH VOICE PORT

PART#: ACC_MK_TALK_THRU
PRODUCT LINE: ACCESSORIES

DESCRIPTION

The MK Metallic Talk-Through Voice Ports are stainless steel voice transmission systems that allow for noise to travel through ballistic glazing while also securing the system from projectiles and minimizing exterior elements. Different MK options are available depending on the aesthetics and level of protection that is looking to be achieved (See "PRODUCTS & RATINGS"). For added protection, stainless steel and painted armor plate backer plates are available for all TSS MK voiceports.

OPTIONS

- Interior And Exterior use (Wind Shield May Be Applied in Exterior Applications)
- Can Be Applied to Any Type of Glazing With Thicknesses 3/8" or Thicker
- 5" Hole Needed to Accept Voice Port
