

PE PIZZA PASSER

PART#: PE_PIZZA_PASSER

PRODUCT LINE: ACCESSORIES

DESCRIPTION

The PP package passer consists of a rectangular box built from transparent bullet resistant glazing material, with a trim handle on the employee side that allows a large pizza box to be passed through a barrier. 2 Litter bottles can also fit in this PE. The PP is designed for moderate to frequent use, long service life, low cost, and little or no maintenance. On the threat/customer side, there is no door. The secure side has a swivel door that can only be opened from the secure side and cannot be fixed open. The system is available in acrylic or polycarbonate.

FEATURES

- Black Laminate Base (Standard)
- Delivered assembled, ready for installation
- UL Levels 1 through 3 ballistic protection
- Door on threat side, open on secure
- Full vision through passer

SIZE OPTIONS
