

SLIDING LID CURRENCY TRAY

PART#: SLIDING_LID_CURRENCY_TRAY

PRODUCT LINE: ACCESSORIES

DESCRIPTION

The TSS Sliding Lid Tray is designed to achieve maximum security while promoting quick and easy transactions for customers. Every tray is constructed of 18-gauge 304L stainless steel with a #4 finish and has joints that have been welded and ground smooth. All trays can be retrofitted into an existing system or included in a new counter/millwork design. Common examples of items that can be passed through the TSS Sliding Lid Tray are cigarette single boxes, small tablets, single chewing tobacco, candy bars, and pill bottles. The tray comes with a keyed cam lock, so the tray can be locked when not in use. This product can achieve UL levels 1 through 8 ballistic resistance with the addition of a TSS bullet trap that incases the tray in a protective shell to prevent projectiles from penetrating.

FEATURES

- No Exposed Fasteners
- Welded Stainless Steel Construction
- Intended for Interior Application
- Lockable Cam Lock
