

## STEEL PE PACKAGE PASSER (INTERLOCKING)

PART#: STEEL\_PE\_PACKAGE\_PASSER\_INTERLOCKING  
PRODUCT LINE: ACCESSORIES

### DESCRIPTION

The SPE package passer consists of a rectangular steel box with prime painted steel doors. A mechanical interlocking mechanism prevents both doors from being opened simultaneously, allowing packages to be passed through a barrier without a breach of security. The SPE is designed to pass small to medium sized packages on a moderate to frequent basis, with a long service life and little or no maintenance. The SBE is available in UL Levels 1 through 8.

### FEATURES

- Adjustable flange allows installation in walls up to 12" thick
- Interlock mechanism allows only one door to open at a time
- Interior or exterior use

### OPTIONAL FEATURES

- Stainless Steel Exterior Door
- Lockable Paddle Latches Available

### SIZE OPTIONS

- 18" x 18" x 18"

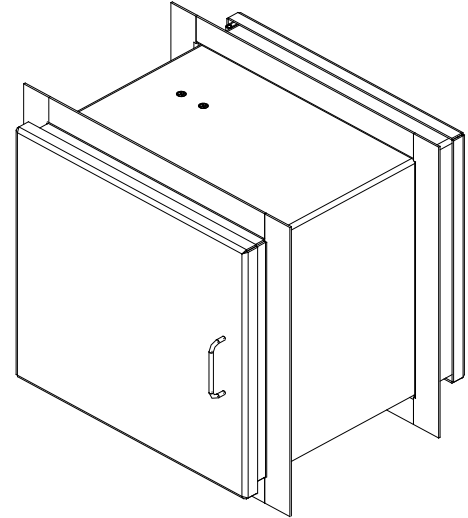

Please inquire for custom sizes.

### RATINGS

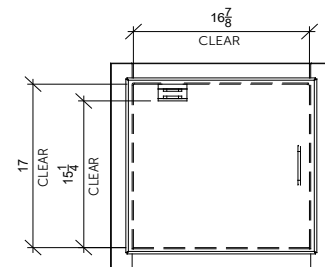

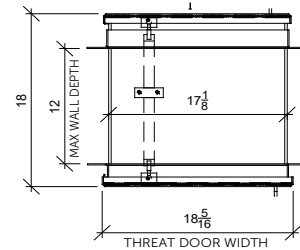

- U.L. Levels 1-8 (Protected with Ballistic Fiberglass and Armor Plate)

### STANDARDS

- U.L. 752 Standard for Bullet Resistant Materials
- ASTM A36/A36M-08 Standard Specification for Carbon Steel
- ASTM A 666 Standard Specification for Annealed or Cold-Worked Austenitic Stainless Steel Sheet, Strip, Plate, and Flat Bar
