

HORIZONTAL BAFFLE WINDOW TRANSACTION LINE SYSTEM

PART#: TLS_HORIZONTAL_BAFFLE
PRODUCT LINE: WINDOWS

DESCRIPTION

The TSS Horizontal Baffle Window offsets the glazing wall sections horizontally by 1½" to allow sound to travel through the system without opening any shooting lanes. There are no visual obstructions making this barrier attractive and as unobtrusive as possible. The frame is offered in satin or dark bronze anodized aluminum, prime painted steel or stainless steel. These systems are great for banks, reception areas, and service counters.
