

## VERTICAL SLIDING CONVENIENCE STORE SYSTEM

PART#: TLS\_VERTICAL\_SLIDER\_CONVENIENCE PRODUCT  
LINE: WINDOWS

### DESCRIPTION

The Vertical Sliding System consists of fixed and sliding transparent bullet resisting panels as needed to secure an opening, along with the aluminum framework, hardware, and fasteners needed for installation. All components are completely fabricated and ready for installation. The manual lift sliding panel can be opened to allow passage of packages and more familiarity with customers during periods of low threat. The system uses custom counter weights designed to the specific weight of the window to raise and lower the vertical sliding glazing with ease.

### OPTIONS

- All TSS Stainless Steel Cash Trays are Available, Oil Tray advised to be used for typical convenience store items
- Hole & Backers and Metallic Voice Ports are available for voice transmission
- Max Width 103 3/8" For System

### RATINGS
