

ALUMINUM VOICE AROUND (AVA) TRANSACTION WINDOW (LEVEL 3)

PART#: TW_ALUM_VOICE_AROUND_LVL3

PRODUCT LINE: WINDOWS

DESCRIPTION

The Aluminum Voice Around Transaction Window, or AVA for short, employs the use of milled slots into the frame that allow sound to travel through the frame, around the bullet resistant glass, while not reducing the level of protection of the frame. This allows for no visual obstructions of voice ports. The AVA framing is tested to a UL Level 3 rating. These windows can be packaged with a stainless steel or plastic laminate countertop, along with a currency tray, voice port, and package exchanger. The transaction window is also available as a fixed 4-sided frame. In addition, this transaction window can be applied as a system or series of connected transaction windows.

OPTIONS

- Intended for Interior Applications
- Available in Clear, Dark Bronze, or Custom Paint/Anodizing
- While No Minimum Exists on the Width or Height for an Aluminum AVA window, Sound Quality will Decrease as the Window Increases in Size. It is Suggested by TSS not to Exceed 60" x 60" Window Size
- Max Glazing Thickness Available is 1 1/2"

RATINGS

- UL Levels 1-6 Glazing Options Available
- UL Level 3 Framing Only

STANDARDS

- Underwriters Laboratory UL 752 Standard for Bullet Resistant Equipment
