

BAFFLE TRANSACTION WINDOW

PART#: TW_BAFFLE
PRODUCT LINE: WINDOWS

DESCRIPTION

The Baffle Transaction Window is an offset glazing system that allows natural sound transmission to flow through bullet-resistant glazing, while not compromising on safety. There are no visual obstructions allowing for clear visibility throughout the window. Not only does sound "baffle" or bounce through the system, the baffle supporting legs remove any shooting lanes created by the 1½" spaced glazing. The window can be paired with a plastic laminate or stainless steel counter and deal tray. The baffle window is also offered without a TSS supplied counter, and can be attached to an existing counter or millwork.

OPTIONS

- Intended For Interior Purposes
- Available in Clear, Dark Bronze, Custom Paint/Anodizing, Prime Painted Steel, & Stainless Steel
- No Minimum Size Exists and the Maximum Size is Constrained by the Glazing Sheets Available for the Particular Level of Protection Needed
